There are five sections that still need a first draft:
  - Part III: Manual
    - **Error and Exception Handling**
    - **Logging and Debugging**
    - **File Monitoring**
    - **Testing**
  - **Part IV: Deployment and Administration**

And here are the resources I've gathered to help whoever ends up writing the chapters:

- Sebastian got xdebug working nicely with FLOW3's subrequests (Logging and Debugging):
  http://blog.sandstorm-media.de/2012/08/debugging-flow3/
- Christopher did a presentation on Project Lifecycle with FLOW3 (Testing & Part IV: Deployment):
  http://www.slideshare.net/ChristopherHlubek/f3x12-flow3-project-lifecycle
- Robert (and others?) built the jenkins server that is running PHPUnit and TYPO3.Surf for the FLOW3 project (Testing & Part IV: Deployment):
  http://ci.typo3.robertlemke.net/

Part IV will need to explain TYPO3.Surf.

Also, while reworking the style of the manual, we'll need to create the glossary as it is quite sparse right now.
