Updated:	2012-07-13	Due date:	
Subject:	Make response format configurable in TypoScript		
Description			
<p>(based on #9216 from extbase; needs some kind of "forward-port" to FLOW3 as suggested by Bastian on gerrit)</p> <p>The response format can only be set using GET/POST parameters.</p> <p>But it would be helpful to set it in TypoScript. For example if you create a new PAGE that outputs ics. You would have to use an url like</p> <p>http://example.org/index.php?id=123&#38;type=150&#38;tx_czsimplecal_pi1[format]=ics</p> <p>what could be considered a repetition.</p> <p>Commit from #9216 adds such a functionality for extbase.</p>			

History

#1 - 2012-03-13 17:00 - Christian Müller

- Project changed from *TYPO3.Flow* to *TYPO3.TypoScript*
- Category deleted (MVC)

#2 - 2012-07-04 11:25 - Sebastian Kurfuerst

- Category set to *_old*

#3 - 2012-07-13 16:20 - Karsten Dambekalns

- Assigned To set to *Karsten Dambekalns*

#4 - 2012-07-13 16:21 - Karsten Dambekalns

- Status changed from *New* to *Closed*
