Well, I don't understand how status has been changed because I did not write previous comment. Anyway, this patch has not been submitted and is still under review in Gerrit.

@Steffen: Could you please describe how to reproduce the problem you face? Don't have it myself.

### #6 - 2011-06-26 19:34 - Steffen Gebert

Oh, that's really weird.. Don't understand, why forge closes an issue. We should keep an eye on this!

Install EXT:dr\_wiki and reload the backend. This triggers the error (even without this patch). I'll file a new issue, as I now found out, how to reproduce.

### #7 - 2011-06-26 19:36 - Steffen Gebert

Sorry, stupid.. forget.. I suggest to handle it within this issue, as it's only reproducible with this change.

Ends up with a PHP warning:

PHP Warning: Invalid argument supplied for foreach() in

It's because the second entry (which is weird..) in \$LOCAL\_LANG is null.
