

## TYPO3.Fluid - Bug # 27678

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Bastian Waidelich	<b>Category:</b>	ViewHelpers
<b>Created:</b>	2011-06-24	<b>Assigned To:</b>	Bastian Waidelich
<b>Updated:</b>	2011-07-27	<b>Due date:</b>	
<b>Has patch:</b>	No		
<b>Affected Flow version:</b>			
<b>Subject:</b>	Deactivate EscapedInterceptor for certain ViewHelpers		
<b>Description</b>	<p>For some of the provided ViewHelpers one can exchangeably use either the <b>value</b> attribute or <b>childnodes</b> as input.</p> <p>So all of the below variants should behave the same:</p> <pre>1 &lt;f:format.plaintext&gt;{foo}&lt;/f:format.plaintext&gt; 2 {foo -&gt; f:format.plaintext()} 3 &lt;f:format.plaintext value="{foo}" /&gt; 4 {f:format.plaintext(value: foo)}</pre> <p>But in fact the first two examples will get an escaped {foo} because by default the EscapedInterceptor is activated.</p> <p>A solution would be to deactivate the interceptor for those ViewHelper by inserting the line</p> <pre>1 protected \$escapingInterceptorEnabled = FALSE;</pre> <p><b>NOTE:</b> This <b>disables</b> htmlspecialchars() from being applied to childnodes so this must not be done for ViewHelpers that directly output the childnodes again!</p>

[BUGFIX] Deactivate EscapedInterceptor for certain ViewHelpers

This change deactivates automatic escaping for ViewHelpers that rely on the raw value.

Change-Id: Iebabe42e5f0d674f4fe9f367b33f6dd7e8acdcda

Resolves: #27678

### History

#### #1 - 2011-06-24 13:51 - Bastian Waidelich

Affected ViewHelpers:

- f:count (not really relevant as it expects numeric strings/integers, but still inconsistent currently)
- f:format.date (**Note:** we should sanitize the format string)
- f:identity.json
- f:escape (Should be marked **deprecated** see #27668)
