

TYPO3.Blog - Bug # 27789

Status:	New	Priority:	Should have
Author:	Bastian Waidelich	Category:	
Created:	2011-06-30	Assigned To:	
Updated:	2011-06-30	Due date:	
Subject:	Escape Post content		
Description			
<p>Currently the post content is outputted with the raw view helper disabling the EscapeInterceptor that applies htmlspecialchars() on the content.</p> <p>This should be avoided in order to prevent XSS attacks!</p> <p>Probably this was added to be able to create "rich text" posts.</p> <p>I'd suggest to add a simple format.mediaWiki view helper (either with the Blog package or even with Fluid) that transforms wiki syntax to (X)HTML.</p> <p>Comments?</p>
