Sprint Focus:	
Subject:	locallangXMLOverride hook has been removed

Description

The hook locallangXMLOverride in t3lib_div::readLLfile() to override language labels has been forgotten while implementing XLIFF (#25397).

It has to be brought back somewhere in tx_lang_Factory::getParsedData() probably.

[BUGFIX] locallangXMLOverride hook has been removed

This feature is back with a small addition. We can now override
a specific language only, with this configuration:

$GLOBALS['TYPO3_CONF_VARS']['SYS']['locallangXMLOverride']
['fr']['EXT:aboutmodules/mod/locallang_mod.xml'][] = 'fileadmin/fr.locallang_mod.xml';
