TYPO3.Flow - Feature # 28074

Status:	Needs Feedback	**Priority:**	Should have
Author:	Markus Bucher	**Category:**	
Created:	2011-07-11	**Assigned To:**	Markus Bucher
Updated:	2012-03-14	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Provide a shell script that installs Phoenix or FLOW3 from git		

Description

The shell scripts should read the neccessary arguments to:

1. checkout the latest version of Phoenix/FLOW3
2. add submodules
3. register the neccessary git config for pushing to gerrit
4. set up the right Settings.yaml
5. add the Phoenix test site

History

#1 - 2012-03-14 14:49 - Christian Müller

- Status changed from New to Needs Feedback

- Has patch set to No

As I see on the mailing list you provide such a script already, so I would like to close this ticket as the script itself wouldn't make sense inside the Distribution anyway. Do you agree?
