[!!!][TASK] (UI): Adjustments to new User Interface

In order to get a working version again, we need to check out Aloha recursively. You need to run the following commands:

```
git submodule init
git submodule update
cd Resources/Public/Library/Aloha/
git submodule init
git submodule update
cd src/plugins/common
git submodule init
git submodule update
cd ../../../../../../
```

Fixed: #28131

This works for me as well:

```
git submodule update --init --recursive Resources/Public/Library/Aloha
```
