Subject:	Add XLIFF files		
Description			
Now that we basically support XLIFF files, we should use this file format.			
See #25397.			
The attached patch was created by Dominique Feyer using the LLXML2XLIFF-Tool .

Dominique's patch used wrong indentation: spaces instead of tabs. I fixed this in v2.

I think the old xml files can then be removed as done in <https://review.typo3.org/#change,2726>.

Currently the translation server is down for the needed updates to XLIFF. As long as that is the case, we won't have localizations available, if we merge that change.

If that is working we should then also go away from including the .xml files with the language labels and instead use the .xlf files.

What about this?

My EGit got broken, it does not let me commit right now.

But I tested v2: It works. Don't forget to delete the 4 XML files.

Thank you, Philipp!

#10 - 2011-08-11 17:22 - Philipp Gampe

How about TYPO3_4-5? Does this use xliiff yet?

#11 - 2011-08-11 17:26 - Chris topher

No; at least not yet.

Maybe it gets backported, but this has not yet happened.
