

TYPO3.Flow - Bug # 28306

Status:	Resolved	Priority:	Must have
Author:	Robert Lemke	Category:	MVC
Created:	2011-07-19	Assigned To:	Bastian Waidelich
Updated:	2011-08-24	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Optional command line argument is ignored		
Description			
Consider the following command as part of a command controller:			
<pre>public function importCommand(\$packageKey = NULL) { var_dump(\$packageKey); }</pre>			
Call the command with <code>./flow3 foo:import MyPackage.Key</code>			
Expected result is MyPackage.Key, but actual result is NULL			

Associated revisions

Revision eba466a3 - 2011-08-25 13:57 - Bastian Waidelich

[!!!][TASK] Some improvements to CLI handling

- Fixes optional argument handling
- Improves readability of help index
- Help for single commands (usage: `./flow3 help <command>`)
- Adds convenience methods `output()`, `outputLine()` and `quit()` to `CommandController` as wrapper for response object
- Adjust existing commands to the new syntax

This is a breaking change because `$this->response->appendContent()` will no longer append a line break. Use `$this->outputLine()` instead.

Another symptom of this bug is the *kickstart:action* controller command:

The second argument "controller name" is optional and its default is "Standard". Currently it is not possible to kickstart any other than a Standard controller, no matter what name is passed as the second argument.

- *Subject changed from Optional command line argument is ignored to Optional command line argument is ignored*

#4 - 2011-08-24 08:10 - Karsten Dambekalns

Just tested the *kickstart:actioncontroller* example and that worked fine... Seems fixed already.
