

FE User Management - Bug # 28475

Status:	Resolved	Priority:	Must have
Author:	Dirk Josefiak	Category:	
Created:	2011-07-26	Assigned To:	Bernhard Baumgartl, datamints GmbH
Updated:	2011-07-28	Due date:	
Subject:	activation link in mail		
Description			
<p>In the newest version 0.7.1 I got some problems with the activation link in e-mails. The error seems to break the page id in the link and results in a 404 Error. I use TYPO3 4.5.3 without realurl or similar tools.</p> <p>The older version of FE User Management doesnt have this error.</p> <p>Here the broken link: http://www.myurl.de/index.php?id=0&#38;tx_datamintsfeuser_pi1%5b684%5d%5bsubmit%5d=approvalcheck&#38;tx_datamintsfeuser_pi1%5b684%5d%5buid%5dx&#38;tx_datamintsfeuser_pi1%5b684%5d%5bhash%5ddb2e3ed24bb063a787210368c0bb8c</p> <p>Greetz Evok</p>

In the newest version 0.7.1 I got some problems with the activation link in e-mails.

The error seems to break the page id in the link and results in a 404 Error.

I use TYPO3 4.5.3 without realurl or similar tools.

The older version of FE User Management doesnt have this error.

Here the broken link:

http://www.myurl.de/index.php?id=0&tx_datamintsfeuser_pi1%5b684%5d%5bsubmit%5d=approvalcheck&tx_datamintsfeuser_pi1%5b684%5d%5buid%5dx&tx_datamintsfeuser_pi1%5b684%5d%5bhash%5ddb2e3ed24bb063a787210368c0bb8c

Greetz

Evok

added:

this only throw an error if using HTML mailtype. with register.mailtype = text it works fine for me.

- Status changed from New to Accepted

Hi,

i already found and solved this problem. :)

It's an encoding problem, sry for that the new version will fix that.

Best Regards

Bernhard Baumgartl
