[FEATURE] Re-introduce Lock Manager

This reintroduces the Lock Manager which locks the whole site while compile time commands are executed. The Lock Manager will protect applications running in Production context against race conditions during cache warming and other code manipulating commands.

The Lock Manager is not active in Development or Testing context.

Change-Id: I764d8df0a31aa8bd84463be88f7375e843de4ef9

Resolves: #28733
