[BUGFIX] Remove unnecessary chmod for PackageStates

The Package Manager tried to adjust the permissions of the PackageStates.yaml file via chmod.

This should not be necessary anymore and could even lead to irritating error messages for some server setups.

In general, the file permissions should be set by the setfilepermissions command in a way that even a newly created PackageStates.yaml has the correct permissions set.

Even I run:

```
su -c './flow3 kickstart:package Julia.Demo'  
Password:  
Created .../Julia.Demo/Classes/Controller/StandardController.php  
Created .../Julia.Demo/Resources/Private/Templates/Standard/Index.html
```

which is using root user, the issue still remains.
