Subject:	Nested FCEs in Templavoila will be destroyed though moving in workspace		

Description
I'm not shure, if it is a workspace or a templavoila bug.
So please be tolerant, if this here is the wrong place.
For more details see: http://bugs.typo3.org/view.php?id=18240

History

#1 - 2011-11-21 01:42 - Stefan Neufeind

Not sure this is related to issue 31663. But could you please try to see if the moving of FCEs you describe is related to the general moving of elements, as described there? If it is related, could you please try out the patch (currently under review) mentioned in 31663?

PS: If 31661 fixes it, we'll also need to close the templavoila-ticket in the other bugtracker.

- Status changed from New to Needs Feedback

#3 - 2011-11-21 10:00 - Webadmin no-lastname-given

Thank you very much, it works fine and seems to solve the problem.

#4 - 2011-11-21 10:32 - Stefan Neufeind
- Status changed from Needs Feedback to Under Review

Thank you for the feedback. Marking this as "under review" since 31663 is under review and you said it fixes the issue for you.

#5 - 2011-11-21 21:54 - Oliver Hader
- Status changed from Under Review to Resolved
- Target version set to 4.5.8
