Updated:	2011-05-05	**Due date:**	
Sprint:			
Subject:	Clean up splitName() in storage backends		
Description			

splitName() is now present in the PDO storage and search backends, but needs to go elsewhere and cleaned up.

Associated revisions

Revision 1e70ee48 - 2009-04-02 12:06 - Karsten Dambekalns

FLOW3:

 - findObjectByIdentityProperties() now can handle multiple identity properties

TYPO3CR:

 - removed use of PHP6 package string operations
 - hasNode() on Nodes now massively performs faster for direct children
 - Session now no longer register new nodes as dirty, speeds up handling of new nodes massively
 - bindValue() no handles all Value types by using their string representation
 - cleaned up splitName() in the storage and search PDO backends, refs #2891
 - moved some PDO prepare() calls out of loops for speedup
 - FLOW3 persistence query can now search for properties being objects
 - started to rewrite QOM parsing in PDO search backend, needs more work!

Revision 1faa4813 - 2009-05-20 14:08 - Karsten Dambekalns

TYPO3CR:

 - cleaned up PDO storage and search backend, refs #2891
 - support querying for objects now works, resolves #2812, refs #1884, refs #1875
 - added more operators for comparison when searching, refs #1884, refs #1875
 - added and cleaned up some tests

History

#1 - 2009-05-12 13:18 - Karsten Dambekalns

- % Done changed from 0 to 30

The same is true for prefixName used in the storage backend.

#2 - 2009-06-10 11:03 - Karsten Dambekalns

- Assigned To deleted (Karsten Dambekalns)

#3 - 2010-12-17 13:03 - Karsten Dambekalns

- Status changed from Accepted to Closed
