Sprint Focus:					
Subject:	Enlarge on click does not work anymore for images				
Description					
Problem: The javascript function openPic is not added anymore to the page when "Enlarge on click" is enabled for images in the cObj "Text with images" or "Images".					
Solution: After a lookup it seems in #27983 (Remove deprecated parts marked for removal) too much was removed. \$GLOBALS['TSFE']->additionalJavaScript was never rendered anymore and is used to add javascript function openPic to the page, when "Enlarge to click" is enabled					
How to reproduce: Add content object "Images" to a page, add an image to it and enable "Enlarge to click". Not a popup but a new tab will open.

[BUGFIX] Enlarge on click for images does not open a popup

With issue #27983 some deprecated parts were removed but obviously too much. Although \$GLOBALS['TSFE']->additionalJavaScript is used throughout the core, after this issue it was never rendered anymore in the frontend.

The javascript function openPic was never added to the frontend because of this.

This patch reinstates the responsible lines which were removed for Enlarge on click
