Updated:	2011-09-22	Due date:	
Has patch:	No		
Subject:	HTML5 Custom Data Attributes		
Description	<p>Fluid should support the use of HTML5 Custom Data Attributes as described in the W3C Specification¹.</p> <p>The Patterns need to be changed so that attributes with "-" are actually identified as such. Currently fluid breaks with such attributes. Furthermore "data-*" won't fit into the current way of registering attributes with a full name and type. Fluid will probably need a solution which allows a registration of patterns for attributes. (always with string as type?)</p> <p>[1]: http://dev.w3.org/html5/spec/elements.html#embedding-custom-non-visible-data-with-the-data-attributes</p>
