## Revision 73156e7e - 2012-12-18 18:12 - Adrian Föder

[TASK] Make getTemplateRootPath() public like its setter

The getTemplateRootPath() method in View\TemplateView now becomes public analogous to its setter counterpart which already is public, too.

Change-Id: Id41710aa33d880cb0c3aad7280002761368f3586 Resolves: #29303 Releases: master, 2.0, 1.1

#### History

## #1 - 2011-10-04 22:02 - Thomas Allmer

I would totally agree to this as if you define the complete path to the template you loose the ability to configure/change it so you would have to create a separate setting which is not very nice usability wise.

If this function gets public you can use it to make it depending on the TemplateRootPath and people are used to change it if needed.

\$view = t3lib\_div::makeInstance('Tx\_Fluid\_View\_StandaloneView');

// \$view->setTemplatePathAndFilename('typo3conf/ext/xform/Resources/Private/Templates/Email/TipAFriend.html'); \$view->setTemplatePathAndFilename(\$this->view->getTemplateRootPath() . 'Email/TipAFriend.html'); \$body = \$view->render();

## #2 - 2011-10-15 10:02 - Bastian Waidelich

- Category set to View

Thomas Allmer wrote:

In your example \$this->view->getTemplateRootPath() would be NULL as you didn't specify a path.

if TYPO3\Fluid\View\TemplateView setTemplateRootPath is public then the getTemplateRootPath should be also

## Hi Fernando,

I agree, that this makes sense in general! We just have to keep this in sync with FLOW3, so please bear with us. In the meantime you could work around this like that:

1\$extbaseFrameworkConfiguration = \$this->configurationManager->getConfiguration( Tx\_Extbase\_Configuration\_ConfigurationManagerInterface::CONFIGURATION\_TYPE\_FRAMEWORK); 2\$templateRootPath = \$extbaseFrameworkConfiguration['view']['templateRootPath'];

no it's the root path of the current view... (which is the value from plugin.tx\_ext.view.templateRootPath) \$view != \$this->view

your workaround certainly works, but it certainly looks like one :p

\$this->view->getTemplateRootPath() seems nicer... what do you think? at some point possible or should I drop the idea and always use the "workaround"

no it's the root path of the current view... (which is the value from plugin.tx\_ext.view.templateRootPath)

In this case you used a Tx\_Fluid\_View\_StandaloneView and that won't know anything about your TS configuration.

your workaround certainly works, but it certainly looks like one :p \$this->view->getTemplateRootPath() seems nicer... what do you think? at some point possible or should I drop the idea and always use the "workaround"

The thing is: It is already a work around if you need to change the template in an action. I would be interested in a realistic use case here. Having said that, I do think that View **variants** make sense sometimes. They might make it into the core sometimes. Until then it's just a matter of a few lines to integrate this (see <a href="http://forge.typo3.org/projects/typo3v4-mvc/wiki/How">http://forge.typo3.org/projects/typo3v4-mvc/wiki/How</a> to change the template for one plugin instance) in your extension. And this looks much less like a work around IMO.

But, still, it might make sense to make getTemplateRootPath() public ;)

In this case you used a Tx\_Fluid\_View\_StandaloneView and that won't know anything about your TS configuration.

I overlooked the \$this-> in your example.

And, you're right, for template based emails you have to deal with the template path obviously (see example solution at <a href="http://forge.typo3.org/projects/typo3v4-mvc/wiki/How">http://forge.typo3.org/projects/typo3v4-mvc/wiki/How</a> to use the Fluid Standalone view to render template based emails)

### #7 - 2011-10-21 13:37 - Karsten Dambekalns

- Affected Flow version set to FLOW3 1.0.0

## #8 - 2012-11-14 08:44 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** has been pushed to the review server. It is available at <u>http://review.typo3.org/16440</u>

### #9 - 2013-03-19 15:01 - Gerrit Code Review

Patch set 1 for branch **2.0** has been pushed to the review server. It is available at <u>https://review.typo3.org/19047</u>

#### #10 - 2013-03-19 15:02 - Gerrit Code Review

Patch set 1 for branch **FLOW3-1.1** has been pushed to the review server. It is available at <u>https://review.typo3.org/19048</u>

# #11 - 2013-03-19 15:37 - Adrian Föder

- Status changed from Under Review to Resolved

- % Done changed from 0 to 100

Applied in changeset commit:0e100edd3ea09247bd887eea93778ce4efdc7284.
