

TYPO3.Flow - Bug # 29374

Status:	Resolved	Priority:	Should have
Author:	Bastian Waidelich	Category:	MVC
Created:	2011-08-31	Assigned To:	Bastian Waidelich
Updated:	2011-08-31	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	ActionController doesn't initialize Errors correctly		
Description			
<p>The ActionController doesn't use the correct controller API in <code>getErrorFlashMessage()</code>, arguments are not passed to the error <code>FlashMessage</code> resulting in the following message:</p> <pre>An error occurred while trying to call %1\$s->%2\$s()</pre> <p>As work around you can override the method <code>getErrorFlashMessage()</code> in your controller.</p>			

History
