

TYPO3.Fluid - Bug # 29395

Status:	Resolved	Priority:	Should have
Author:	Ferdinand Kuhl	Category:	
Created:	2011-08-31	Assigned To:	
Updated:	2011-11-08	Due date:	
Has patch:	No		
Affected Flow version:	FLOW3 1.0.0		
Subject:	SelectViewHelper with multiple=true cannot work with Collections		
Description	<p>When using collections as preselected values for SelectView-Helper with option multiple="1" the preselection is only possible when you have a "public" identity field.</p> <p>The preselection for lists does only work if "optionValueField"-Argument is set, which you cannot use with the internal flow3-identity.</p> <p>First part of the solution is:</p> <pre>1/** 2 * Retrieves the selected value(s) 3 * 4 * @return mixed value string or an array of strings 5 * @author Bastian Waidelich <bastian@typo3.org> 6 */ 7protected function getSelectedValue() { 8 \$value = \$this->getValue(); 9 if (!\$this->hasArgument('optionValueField') && !is_array(\$value)) { 10 return \$value; 11 }</pre> <p>(Important is the & ! is_array())</p> <p>But than further the code runs in the next problem selecting by using \$this->arguments['optionValueField'] to retrieve the value.</p>

History

#1 - 2011-09-02 20:13 - Johannes K

- *File patch29395.diff added*

Had this issue, too.

Attached a patch (including testcase)

#2 - 2011-09-02 20:21 - Ferdinand Kuhl

Would you mind, if I push your patch to Gerrit?

I do remember that there somewhere is a task to refactor all form-elements, so perhaps the core team already addresses this issue...

#3 - 2011-09-03 13:36 - Johannes K

I would be happy if you could push it to Gerrit.

I would do it myself, but I haven't signed the CLA yet.

Thanks, Johannes
