

TYPO3.Flow - Bug # 29486

Status:	Resolved	Priority:	Should have
Author:	Robert Lemke	Category:	Object
Created:	2011-09-05	Assigned To:	Robert Lemke
Updated:	2011-09-05	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	injectSettings() doesn't receive always the settings of its own package		
Description			
injectSettings() should always receive the settings of that package the inject method is declared in. That is, we should derive the package key for the settings from the name of the class containing the injectSettings() method.			
Currently this is not the case for settings injection defined in the Objects.yaml and referring to a different class (see related issue).

[BUGFIX] Injected settings are now from the correct package

This fixes a bug caused by the Configuration Builder which resulted in settings of a wrong package being injected into classes under certain circumstances.
