TYPO3.Neos - Bug # 29539

Status:	Closed	**Priority:**	Must have
Author:	Bastian Waidelich	**Category:**	Services
Created:	2011-09-07	**Assigned To:**	Karsten Dambekalns
Updated:	2012-04-18	**Due date:**	
Subject:	Importing a Site from XML does not work if DB is not empty		

Description

When trying to import the T3CON11 Site via

    flow3 typo3.typo3:site:import < Packages/Sites/TYPO3.T3con11Typo3Org/Resources/Private/Content/Sites.xml

I get following error:

    Error: During import an exception occured. Notice: unserialize(): Error at offset 60 of 3284 bytes in
    Packages/Framework/Doctrine/Classes/DBAL/Types/ArrayType.php line 46

After reseting the database (delete, re-create) the command works once.

Interestingly the export command works

    flow3 typo3.typo3:site:export > Export.xml

But re-importing that export results in another error:

    Error: During import an exception occured. String could not be parsed as XML

History

#1 - 2011-09-07 11:57 - Bastian Waidelich

- File Export.xml added

Attached the XML file that the export command creates from the most current T3CON11 site

#2 - 2011-09-07 12:00 - Bastian Waidelich

..As you can see the export is truncated thus creating invalid XML

#3 - 2011-09-07 12:04 - Karsten Dambekalns

- Category set to Services

- Status changed from New to Accepted

#4 - 2011-09-07 12:11 - Bastian Waidelich

- File 20110907120922fd1e50.txt added

In case of the export error an debug backtrace file is created (attached)

#5 - 2011-09-28 10:09 - Karsten Dambekalns

- Status changed from Accepted to Needs Feedback

Is this still an issue? For me this worked fine throughout, and I assume this to be caused by some broken data in the DB (encoding, broken import, ...) that now caused the reading of data for import to be corrupted.

I had the issue again with latest version of the conference distribution. But after re-creating the database again I can't reproduce the problem anymore. Closing the issue for now!

- Status changed from Closed to Needs Feedback

..Unfortunately this is **not** resolved.
I just got the same error again with the latest conference distribution..

Note: This has to do with the structure/size of the XML file. With the Flow3Org Site it works, but the T3CON site still dies with error   Notice: unserialize(): Error at offset 60 of 3287 bytes in .../ArrayType.php

#9 - 2011-11-07 10:28 - Sebastian Kurfuerst

@Bastian: does this error still exist?

Greets, Sebastian

#10 - 2012-04-18 22:40 - Karsten Dambekalns

- Status changed from Needs Feedback to Closed

Working fine for months now in the automated deployment… No clue how to debug this further.
