Complexity:			
Subject:	Implement replace() method for the base Repository		
Description			
The base Repository implementation should implement a method which allows for replacing an object which exists in the repository by another object. This method (or the methods called by this method) must take the identity map and uuid into account.			

Associated revisions

Revision d473c120 - 2009-03-26 14:25 - Robert Lemke

- FLOW3: (Persistence) Renamed the methods `getUUID($object)` to `getUUIDByObject($object)` and removed one of them from the Persistence Manager (now ask the Persistence Backend instead).
- FLOW3: (Persistence) Implemented a `replace()` method for the base Repository. Resolves #2979
