

TYPO3.Kickstart - Bug # 29791

Status:	Resolved	Priority:	Must have
Author:	Karsten Dambekalns	Category:	
Created:	2011-09-14	Assigned To:	Bastian Waidelich
Updated:	2012-12-12	Due date:	
Affected Flow version: FLOW3 1.0.0			
Subject: When kickstarting models with collections, invalid code is generated			
Description			
Not in all cases, but when using collections with element type hints, the generated code is wrong:			
<pre>./flow3 kickstart:model TYPO3.Blog Blog 'posts:\Doctrine\Common\Collections\Collection<\TYPO3\Blog\Domain\Model\Post>'</pre>			
results in setter code like			
<pre>/** * Sets this Blog's posts * * @param \Doctrine\Common\Collections\Collection<\TYPO3\Blog\Domain\Model\Post> \$posts The Blog's posts * @return void */ public function setPosts(\Doctrine\Common\Collections\Collection<\TYPO3\Blog\Domain\Model\Post> \$posts) { \$this->posts = \$posts; }</pre>			
which results in a nasty error like			
PHP Parse error: syntax error, unexpected '<', expecting '&' or T_VARIABLE in .../Model/Blog.php on line xx

[BUGFIX] Fix type hint of collections in generated model classes

This makes sure that, when using collections with element type hints, only the collection class name ends up in the type hint of the generated setter.
