TYPO3.Flow - Bug # 29792

Status:	Resolved	**Priority:**	Must have
Author:	Karsten Dambekalns	**Category:**	MVC
Created:	2011-09-14	**Assigned To:**	Bastian Waidelich
Updated:	2011-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	exceeding arguments are ignored if a command has optional arguments

Description

When kickstarting a model with

./flow3 kickstart:model TYPO3.Blog Blog title:string description:string

the generated code will not contain any trace of the title property. A "workaround" is possible: Calling

./flow3 kickstart:model TYPO3.Blog Blog dummy:prop title:string description:string

will result in a model with title and description (and without dummy).

That could very well be a problem of CLI argument handling, though.

[!!!][BUGFIX] Optional CLI arguments have to be named

Currently exceeding arguments are ignored if a command has optional
arguments, because the RequestBuilder then can't differentiate them.

This change requires options to be named:
For commands expecting one optional argument you were able to write
./flow3 command value
Now you'd have to write
./flow3 command --optional-argument value

- Subject changed from kickstart:model ignores first given property to exceeding arguments are ignored if a command has optional arguments

- Category set to MVC

- Status changed from New to Accepted

#3 - 2011-09-15 11:58 - Bastian Waidelich

The problem seems to be that the kickstart:model has a third argument force that is optional.

So the third argument is mapped to this method parameter.

I currently don't know a solution for this, but I'll look into it again.
