

TYPO3.Flow - Bug # 29895

Status:	Resolved	Priority:	Should have
Author:	Karsten Dambekalns	Category:	Command
Created:	2011-09-16	Assigned To:	Karsten Dambekalns
Updated:	2011-09-18	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	"help <identifier>" command does not work any longer		
Description			
<p>With the fix for #29792 the "help <identifier>" command stopped working. This is caused by the assumption of optional arguments being usable when used unnamed. The mentioned fix make it required to use optional arguments in a named form (as intended), thus this no longer works.</p>

[BUGFIX] Fix help command controller argument use

The command controller was intended to be used with the optional command identifier without using that as a named option - but that is a requirement. Thus we now use the first exceeding argument if the option is not given.

Change-Id: I29751f17e78cc1415192e268fb78a469a1c21e63

Fixes: #29895
