TYPO3 Flow Base Distribution - Bug # 30163

Status:	Resolved	**Priority:**	Must have
Author:	Rens Admiraal	**Category:**	
Created:	2011-09-21	**Assigned To:**	
Updated:	2011-09-21	**Due date:**	
Affected Flow version:			
Subject:	var_dump recursion error		
Description			

If you dump an object which is in the blacklist of the debugger you have a chance on recursion since the actual dumped object is not checked against this array. For example the PersistenceManager. A dump of this object ends up in a memory exhausted error in PHP.

[BUGFIX] Fix recursion error in \TYPO3\FLOW3\var_dump()

A var_dump of for example the PersistenceManager results in a memory
error. This happens because the dumped object is not checked against
the blacklisted class list.
