

TYPO3.Flow - Feature # 3030

Status:	Resolved	Priority:	Could have
Author:	Thomas Fritz	Category:	Error
Created:	2009-04-03	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	Testing framework can send bug report to mailinglist		
Description			
<p>After the test suites are completed and a test failed, ask the Developer if a detailed bug report should be send to the TYPO3 Mailinglist. Of course only if a failed test belongs a to a public package. If you have ever compiled php and did a make test you might actually know what i mean.</p> <p>This behaviour could also expanded when an exception was thrown.</p>

[~TASK] FLOW3 (Error): the DebugExceptionHandler now shows a link to Forge for creating an issue - we'll see how that turns out... Resolves #3030.

History

- Target version set to 283

#2 - 2009-07-13 11:25 - Robert Lemke

- Target version deleted (283)

#3 - 2009-09-28 15:25 - Karsten Dambekalns

For the testing framework I would not do this. Tests in that part should fail on the developer's machine or the CI server. Thus we don't need any mails to bother innocent developers :)

For the exception handling, I partly agree. But I would not send an email but rather link to a form for a new issue on forge with some stuff pre-filled in the form. This is easily done:

[http://forge.typo3.org/projects/package-<key>/issues/new?issue\[subject\]=Foo&issue\[description\]=Bar+Baz&issue\[category_id\]=76](http://forge.typo3.org/projects/package-<key>/issues/new?issue[subject]=Foo&issue[description]=Bar+Baz&issue[category_id]=76)

#4 - 2009-09-28 15:32 - Karsten Dambekalns

- Status changed from New to Accepted

- Assigned To set to Karsten Dambekalns

- Target version set to 1.0 alpha 5

#5 - 2009-09-28 19:00 - Karsten Dambekalns

- Status changed from Accepted to Resolved

- % Done changed from 0 to 100

Applied in changeset r3233.
