TYPO3.Flow - Bug # 30379

Status:	Resolved	**Priority:**	Must have
Author:	Robert Lemke	**Category:**	- Testing -
Created:	2011-09-28	**Assigned To:**	Robert Lemke
Updated:	2011-09-28	**Due date:**	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Object persistence has side effects in functional tests		
Description			

Unpersisted objects which have been added, but not persisted (no Entity Manager flush() called) will still be present in following tests and thus generate side effects.

Associated revisions

Revision 10af83a3 - 2011-09-28 11:27 - Robert Lemke

[BUGFIX] No persistence side effects anymore in functional tests

Doctrine's Unit of Work still contained objects from previous tests.
In order to prevent side effects, the Entity Manager must be cleared
before executing further tests.
