TYPO3.Flow - Bug # 30467

Status:	Resolved	**Priority:**	Should have
Author:	Andreas Förthner	**Category:**	Persistence
Created:	2011-09-30	**Assigned To:**	Andreas Förthner
Updated:	2011-12-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version: FLOW3 1.0.0	
Subject:	Doctrine fails to initialize AOP and DI in some cases
Description	

When a Doctrine lazy loading proxy for an object is created for some specific purpose (e.g. when initializing session objects relating to an entity) but filled afterwards "on the fly" if this object is part of a wide range "findBy" call through some query, Doctrine initializes the lazy loading proxy but does not call __wakeup and therefore not initialize AOP and DI.

[BUGFIX] Doctrine@PostLoad calls DI and AOP initialization explicitly.

When a Doctrine lazy loading proxy for an object is

created for some specific purpose (e.g. when initializing

session objects relating to an entity) but filled afterwards

"on the fly" if this object is part of a wide range "findBy"

call through some query, Doctrine initializes the lazy

loading proxy but does not call __wakeup and therefore not initialize AOP and DI.

We work around this issue, by initializing those objects

with a Doctrine PostLoad hook explicitly.
