

TYPO3 Flow Base Distribution - Bug # 30543

Status:	Closed	Priority:	Should have
Author:	Soren Malling	Category:	
Created:	2011-10-04	Assigned To:	
Updated:	2011-10-20	Due date:	

Affected Flow version:

Subject: Classes disappearing cause havoc

Description

After "pulling" to commit a1c1304a26fd6e9173adccf58c6adb2b462d820f I got the following error in FLOW3 CLI

```
aafie4300:typo3v5 sorenmallings$ ./flow3
```

```
Uncaught Exception in FLOW3 #1265213849: The object "TYPO3\Media\Domain\Repository\ImageRepository" which was specified as a property in the object configuration of object "TYPO3\TYPO3\Controller\Backend\ContentController" (automatically registered class) does not exist. Check for spelling mistakes and if that dependency is correctly configured. thrown in file Packages/Framework/TYPO3.FLOW3/Classes/Object/DependencyInjection/ProxyClassBuilder.php in line 423

Karsten mentions in his "tweeting" with me

Ah, well. Classes disappearing cause havoc, true.

Sorry, can't give better explanation ATM

History

#1 - 2011-10-12 10:42 - Robert Lemke

- *Status changed from New to Closed*

- *Target version set to 1230*

The problem in your case was that the Media package was not available because you probably didn't update the submodules.

The error message is correct – the mentioned class is not available. As long as we don't have dependency checking support in the Package Manager (planned for 1.1), there's nothing we really can do about it.

#2 - 2011-10-20 01:42 - Karsten Dambekalns

- *Target version deleted (1230)*
