

## TYPO3.Neos - Bug # 30584

<b>Status:</b>	Resolved	<b>Priority:</b>	Should have
<b>Author:</b>	Christian Müller	<b>Category:</b>	
<b>Created:</b>	2011-10-05	<b>Assigned To:</b>	
<b>Updated:</b>	2011-12-23	<b>Due date:</b>	
<b>Subject:</b>	setup command should not create account with same identifier twice		
<b>Description</b>			
Either setup command controller or account model itself should ensure uniqueness of accounts.			
Simple to reproduce, just run:			
<pre>./flow3 setup:createadministrator --identifier admin --password pass</pre>			
multiple times and check DB contents.			
Please comment about which option would be best (setting unique constraint in account model or checking the accountRepository in command controller), I can take care of the patch.

[TASK] Prevent setup of duplicate admin accounts

Change-Id: I18810dcc5729fcddd63a396b2b719caed1e21113

Resolves: #30584

### History

#### #1 - 2011-10-06 00:36 - Regine Rosewich

If a valueObject would be possible, that would be the best solution. Otherwise a unique constraint would be the simplest solution.

#### #2 - 2011-11-07 10:17 - Sebastian Kurfuerst

- Assigned To set to Christian Müller

I think setting unique constraint in account model makes perfect sense.

#### #3 - 2011-11-23 12:50 - Christian Müller
