Core - Feature # 30594

Status:	Closed	Priority:	Should have
Author:	Stefan Neufeind	Category:	Extension Manager
Created:	2011-10-06	Assigned To:	
Updated:	2015-01-08	Due date:	
PHP Version:			
Complexity:			
Sprint Focus:			
Subject:	Allow packages to be signed		

Description

This will require changes to:
 	
  - Extension-archives (allow them to be signed)
 	
    - either using an external signature (easier to integrate with current packages
 	
    - or using an internal signature (will require changes to package-format)
 	
  - Extension-manager (configuration/verification of signatures; optional per repository)
 	
  - Extension-repository (automatically sign packages uploaded to the official TYPO3-repository)

History

#1 - 2011-10-06 07:17 - Stefan Neufeind

This will help ensure that extensions (from the official repository or from a local repository) are unmodified. This will help validate integrity especially for the use of unsecure communication (http) or the use of (potentially unreliable) mirror-servers.

#2 - 2014-12-18 12:53 - Mathias Schreiber

- Category set to Extension Manager

#3 - 2015-01-08 14:41 - Mathias Schreiber

- Target version set to 7.3 (Packages)

#4 - 2015-01-08 14:42 - Mathias Schreiber

- Status changed from New to Closed

Taken into account in #63909.

The issues are not linked on purpose, so the refactoring ticket does not get bloated with relations.
