Core - Bug # 30643

Status:	Resolved	**Priority:**	Should have
Author:	Steffen Gebert	**Category:**	Workspaces
Created:	2011-10-07	**Assigned To:**	
Updated:	2015-06-01	**Due date:**	
TYPO3 Version:	4.6		
PHP Version:			
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	Fatal Error in Workspaces preview		

Description

When opening the horizontal/vertical WS previews, I get the following error:

Fatal error: Call to a member function getSessionData() on a non-object in
typo3/sysext/workspaces/Classes/Service/Fehooks.php on line 50
Call Stack

#	Time	Memory	Function	Location
1	0.0001	642312	{main}( )	../profile.php:0
2	0.0050	905464	require('/opt/local/www/master/typo3_src/index.php')	../profile.php:4
3	0.0064	1108056	require('/opt/local/www/master/typo3_src/typo3/sysext/cms/tslib/index_ts.php')	../index.php:78
4	1.3018	25442840	tslib_fe->hook_eofe( )	../index_ts.php:500
5	1.3018	25444312	t3lib_div::callUserFunction( )	../class.tslib_fe.php:3818
6	1.3023	25458696	call_user_func_array ( )	../class.t3lib_div.php:4677
7	1.3023	25458840	Tx_Workspaces_Service_Fehooks->hook_eofe( )	../class.t3lib_div.php:4677

The line causing this error is

```
$GLOBALS['BE_USER']->getSessionData('workspaces.backend_domain')
```

I am still logged in in the backend. The slider works. Working on master with Introduction Package.

Revision fc3a6e70 - 2015-06-01 14:31 - Peter Niederlag

[BUGFIX] dont set fePreview=2 with ADMCMD_noBeUser

The workspace preview adds the GET parameter ADMCMD_noBeUser
when requesting the frame for live preview.

$GLOBALS[BE_USER] is unset in index_ts.php when seeing ADMCMD_noBeUser.

In TypoScriptFrontendController fePreview=2 must not be set when
ADMCMD_noBeUser parameter is present to prevent fatal errors on
calling methods on a non-existent $GLOBALS[BE_USER]

History

#1 - 2011-10-07 23:49 - Steffen Gebert

P.S: I get this error in the right/bottom frame of the WS preview.

#2 - 2011-10-19 23:23 - Tolleiv Nietsch

- Status changed from New to Needs Feedback

Hm maybe a plugin which influences the BE_USER ?

#3 - 2011-10-19 23:38 - Steffen Gebert

Well.. looks like it's now working. Dunno what was wrong.

#4 - 2011-11-21 00:53 - Stefan Neufeind

Steffen, any idea what might have gone wrong or what we could take a look at? Otherwise I'd suggest to close this bug.

#5 - 2011-11-21 19:00 - Steffen Gebert

I guess it can be closed. It did not occur anymore..

#6 - 2011-11-22 10:15 - Stefan Neufeind

I'd like to re-open this because I got the same(?) error in 4.5.11.

While I cannot reproduce the problem on another site, here is what I have to do to reproduce it on the site where it occurred.

1. Log in to an account which only has access to a draft workspace.
2. Change the title of a shortcut page.
3. Preview the page.

The line
Fatal error: Call to a member function getSessionData() on a non-object in
/foo/bar/typo3_src-4.5.11/typo3/sysext/workspaces/Classes/Service/Fehooks.php on line 44
will appear instead of the draft preview on any visual preview (slider or splits).

I'm not sure which one of the details above play a role. The site also uses CoolURI which I wouldn't expect to play a role.

I also got this error-message in my PHP-logfile in 4.5.14. But i can't reproduce it :-(

#9 - 2012-08-09 10:28 - Luc Muller

Hi Guys

Anyone has a hint on this problem ?

I got the same problem using 4.5.11

By my side it occurs when I try to preview a tt_news record in workspace.

Here are some hint on my configuration.

Got a Workspace that give the user only access to a sysfolder "Articles". and a tt_news single page to preview articles
Got tt_news preview properly configured (tx_ttnews.singlePid = 13) in TSConfig

The user edit some article and then click save and preview.

Thus resulting in the php error declared above.

I'm thinking of an access problem to something but don't know where to look at... everything seems to be properly configured.

#10 - 2012-12-17 01:08 - Christian Lerrahn

I have encountered this problem again on 4.5.19. The object $GLOBALS['BE_USER'] is NULL if the backend user is currently set to preview. If you switch to live workspace in the backend, so can preview the drft workspace without any issue.

#11 - 2012-12-18 20:12 - Urs Braem

I have a very similar issue in TYPO3 6.0.0

Fatal error: Call to a member function getSessionData() on a non-object in /home/xxx/public_html/gov/typo3_src-6.0.0/typo3/sysext/workspaces/Classes/Hook/TypoScriptFrontendControllerHook.php on line 49

I am viewing as admin user.

No difference if I'm in the live or draft workspace

EDIT: I'm using the government package as downloaded from typo3.org, out of the box

- Is Regression set to No

This problem is only uncovered when the user has clicked the link that is generated by "generate workspace preview link".

TYPO3\CMS\Workspaces\Controller/PreviewController

- PreviewController adds *&ADMCMD_noBeUser=1* to the url to be called for the live version
- index_ts.php unsets $GLOBALS['BE_USER'] when seeing *ADMCMD_noBeUser=1*

Calling the "generate workspace preview link"

- the preview link has *ADMCMD_prev=#HASH#*
- TYPO3\CMS\Version\Hook\PreviewHook checks for *ADMCMD_prev* and sets a **cookie** that effectivly makes the workspace preview persistent for the session

Regular Frontend url's now have (persistent) workspace preview enabled

- TSFE->fePreview=2 is set
- TYPO3\CMS\Workspaces\Hook\TypoScriptFrontendControllerHook pops in due to TSFE->fePreview=2 and tries to access

$GLOBALS['BE_USER']

- **fatal error**

It is available at https://review.typo3.org/27834

#16 - 2014-02-26 10:48 - Thomas Sperling

I get a similiar error, but in typo3/sysext/workspaces/Classes/Hook/TypoScriptFrontendControllerHook.php on line 49.
This patch doesn't solve it for me. I think the Problem is that in the IFrame document.domain is not set. Is this problem related or is it a different problem?
