TYPO3.Fluid - Bug # 3075

Status:	Resolved	**Priority:**	Must have
Author:	Niels Pardon	**Category:**	
Created:	2009-04-11	**Assigned To:**	Jochen Rau
Updated:	2010-10-20	**Due date:**	
Has patch:			
Affected Flow version:			
Subject:	TranslateViewHelper: TypoScript override does not work		
Description			

The problem is that the configuration manager that is requested in the TranslateViewHelper has an empty array in $this->settings. So somehow the Singleton stuff is not working correctly as the confuiguration manager created in the dispatcher has the right configuration in $this->settings.

I couldn't find out the cause of the problem. Any help is appreciated.

Thanks, Jochen! It would have taken me years to figure out where that issue comes from. Sometimes fixes are so easy.
