Subject:	Improved Test Search

Description

Normally you just need to check the whole project only once.

Sometimes one file is to less.

So it would be cool to test a subcompoment/subpackage.

e.g.:

'T3_FLOW3CGL_Model_'

The search must end with an underline.

Perhaps not final solution, but a quick powerful solution.

History

#1 - 2008-02-20 00:23 - Malte Jansen

- File Testing_ImprovedSearch_v2_trunk.patch added

- Assigned To set to Sebastian Kurfuerst

After a discussion with Sebastian a more common version.

Now, the search string is compare with classname, so you just have to enter the first characters of a class, and all other classes starting with same string are also tested.

e.g. "T3_FLOW3CGL_Ch" will test all tests for the checks.

#2 - 2008-10-28 21:59 - Malte Jansen

- File Testing_v3.patch added

I have adjusted this patch and included http://forge.typo3.org/issues/show/1649 too.

Additionally there is a small improvment, which saves 1-2 seconds (DuoCore 2,27GHz) with the FLOW3 Distribution. You'll same more time, if you have more packages included. Now no normal-class ending with Test will be running as test, which now might cause some problems in the Test-Enviroment.

Notice: With this patch it's also possible to run all tests in a certain namespace.

#3 - 2011-05-26 18:51 - Sebastian Kurfuerst

- Assigned To deleted (Sebastian Kurfuerst)
