Updated:	2011-10-19	Due date:	
Sprint:			
PHP Version:			
Has patch:			
Complexity:			
Subject:	Make PHP session configurable		
Description	<p>I'm using FLOW3 in a subdomain environment and need a way to have valid session cookies for all subdomains of a php session. It's easy to implement by adding some parameters in the start method of PHPSession.php</p> <pre>\$cookieParameters['lifetime'], \$cookieParameters['path'], \$cookieParameters['domain'], \$cookieParameters['secure'], \$cookieParameters['httponly']);</pre> <p>The cookie params could be set by adding the following yaml options.</p> <pre>TYPO3: FLOW3: session: PHPSession: cookie: lifetime: 3600 path: '/' domain: '.domain.com' secure: false httponly: false</pre>		

History

#1 - 2011-10-19 09:59 - Karsten Dambekalns

- Project changed from TYPO3 Flow Base Distribution to TYPO3.Flow

#2 - 2011-10-19 09:59 - Karsten Dambekalns

- Category set to Session

- Status changed from New to Resolved

- Target version changed from 1230 to 1.0.0

- % Done changed from 0 to 100
