Updated:	2010-10-20	**Due date:**	
PHP Version:			
Has patch:			
Complexity:			
Subject:	Support new method "initializeXYAction" in controllers		
Description			

Controllers should check if a method "initializeFooAction" exists for an action "foo" and call it before the action "fooAction" is called. This method is supposed to replace the current "initializeArguments" method which should be removed.

Associated revisions

Revision 39712da5 - 2009-04-16 00:18 - Robert Lemke

- FLOW3: (MVC) A method called "initializeFooAction" will now be called before an action "foo" at a time arguments still can be registered.

Resolves #3091

- FLOW3: (MVC) !!! Removed the initializeArguments() method from the ActionController. Use initializeXYAction() or initializeAction() instead!
