

TYPO3.Flow - Bug # 30934

Status:	Resolved	Priority:	Should have
Author:	Thomas Hempel	Category:	Persistence
Created:	2011-10-14	Assigned To:	Karsten Dambekalns
Updated:	2011-12-19	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: FLOW3 1.0.0			
Subject:	persistAll() should only be called if EntityManager is still alive		
Description			
In some cases it can happen, that the EntityManager is closed at the end of an controller. This can be a valid situation. See #30933 for more information.			
It would be good if the persistAll() method is only called if the EntityManager is really functioning.

[BUGFIX] Only flush() the Doctrine ORM if it is open

In some cases it can happen, that the EntityManager is closed at the end of a request This can be a valid situation (see #30933 for more).

This change makes persistAll() check if the EntityManager is open before calling flush() on it.

[TASK] Log skipped persistAll() due to closed EntityManager

To avoid exceptions we only flush the EM if it is still open. To be able to spot errors more easily, this adds a log entry if the EM was closed and flushing was skipped.
