

TYPO3.Fluid - Bug # 30935

Status:	Resolved	Priority:	Should have
Author:	Bastian Waidelich	Category:	Core
Created:	2011-10-14	Assigned To:	Christian Müller
Updated:	2015-06-15	Due date:	
Has patch:	No		
Affected Flow version:	FLOW3 1.0.0		
Subject:	Catch ViewHelper exceptions and log them in production context		
Description			
from line 241 of the AbstractViewHelper:			
<pre>1 try { 2 return call_user_func_array(array(\$this, 'render'), \$renderMethodParameters); 3 } catch (\TYPO3\Fluid\Core\ViewHelper\Exception \$exception) { 4 // @todo [BW] rethrow exception, log, ignore.. depending on the current context 5 return \$exception->getMessage(); 6 }</pre>			
As the todo comment states, this should be caught in production context and logged to prevent information disclosure. Code could look something like:			
<pre>1 try { 2 return call_user_func_array(array(\$this, 'render'), \$renderMethodParameters); 3 } catch (\TYPO3\Fluid\Core\ViewHelper\Exception \$exception) { 4 if (\$this->objectManager->getContext() === 'Development') { 5 return \$exception->getMessage(); 6 } else { 7 \$this->systemLogger->log([...]); 8 return ""; 9 } 10 }</pre>

Revision 5fa13298 - 2011-11-10 14:18 - Christian Müller

[BUGFIX] ViewHelper Exceptions should be logged in Production

In Production context all Exceptions from ViewHelpers will be silently logged. In Development they will be re-thrown so the global exception handler will be triggered.

Resolves: #30935

Releases: 1.1

Change-Id: I4af4d03ff6048fcc8999f4a48d5c2897dc43fc4e
