Subject:	Generating ActionControllers using a comma separated list creates wrong Models and Repositories		

Description

Using the following command:

> ./flow3 kickstart:actioncontroller --generate-related --generate-actions Acme.Demo Animal,Zoo

One would expect the Kickstarter to create 2 Models and 2 corresponding Repositories:

Model/Animal.php
Model/Zoo.php
Repository/AnimalRepository.php
Repository/ZooRepository.php

Instead, the following Model and Repository are created:

Model/Animal,Zoo.php
Repository/Animal,ZooRepository.php

Dang, missed the needed --generate-actions, then it's indeed broken.
