

## Core - Bug # 31209

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Joh. Feustel	<b>Category:</b>	TypoScript
<b>Created:</b>	2011-10-24	<b>Assigned To:</b>	
<b>Updated:</b>	2012-02-07	<b>Due date:</b>	
<b>TYPO3 Version:</b>	4.6		
<b>PHP Version:</b>			
<b>Complexity:</b>			
<b>Is Regression:</b>			
<b>Sprint Focus:</b>			
<b>Subject:</b>	CONTENT still can't select records from rootpage		
<b>Description</b>			
<p>The Problem described in #20412 still exists.</p> <p>"If you use the "CONTENT" TypoScript object, to retrieve records from the root-page - like "static_countries", etc. This is currently not possible."</p> <p>The following code will return nothing since checkPidArray() checks for existing pages and removes 0 from pidInList</p> <pre>10 = CONTENT 10 {     table = static_countries     select {         pidInList = 0         selectFields = uid, cn_iso_3, cn_official_name_en     }     renderObj= TEXT     renderObj {         wrap = &lt;li&gt; &lt;/li&gt;         field = cn_official_name_en     } }</pre>			
<p>Obviously there as been a Fix for this Problem which has been reverted in SVN Trunk (rev. 6146) see <a href="http://forge.typo3.org/issues/19762#note-3">http://forge.typo3.org/issues/19762#note-3</a></p>

### History

#### #1 - 2011-11-06 13:21 - Myroslav Holyak

It seems to be resolved in current trunk. Hopefully it will be released in 4.6.1

#### #2 - 2011-11-06 20:51 - Joh. Feustel

Hi Myroslav,

could you point me to the corresponding issue or patch in Gerrit? i would like to review and test this but cannot find anything while it still is not working for me with latest checkout.

**#3 - 2011-11-24 15:26 - Andreas Bouche**

*- Target version set to 4.6.2*

Unfortunately this has not been fixed with the release of 4.6.1.

In my opinion this should be a "must have". There are definitely a lot of Extensions that rely on this Feature. Also this is the common way for building language or country selects in Formhandler or Form. This is not possible at the moment and should be fixed as soon as possible.

I will try to submit a patchset for this soon.

**#4 - 2011-12-03 00:16 - Myroslav Holyak**

Well, i'll better stay on 4.5.latest till this issue will be fixed... Just curious - shouldn't be such core-functionality covered with unit tests to avoid such errors?

**#5 - 2011-12-16 15:02 - Soeren Kracker**

*- Target version changed from 4.6.2 to 4.6.3*

It's still not fixed in 4.6.2.

The linked fix wouldn't give attention to other tables than pages anyway. In my case I need to set pidInList = 0 and table = static\_countries

**#6 - 2012-01-17 11:58 - Gerrit Code Review**

*- Status changed from New to Under Review*

Patch set 3 for branch **master** has been pushed to the review server.

It is available at <http://review.typo3.org/7826>

**#7 - 2012-01-23 22:04 - Ernesto Baschny**

Meanwhile, the solution for #32374 was merged in <http://review.typo3.org/7839> (4.6) and <http://review.typo3.org/7739> (4.7 = master).

Please check if this solves your particular problem, if it does, we might add a "duplicate" tag to this and close it.

Thanks!

**#8 - 2012-01-24 11:39 - Markus Klein**

Hi Ernesto,

as you can see in Gerrit, I've already abandoned my changeset.

Feel free to close this issue or mark it as resolved.

I've added #32374 as related, since the titles of the issues do not really sound like "duplicates".

Cheers

**#9 - 2012-01-24 14:55 - Ernesto Baschny**

- *Category set to TypeScript*
- *Status changed from Under Review to Resolved*
- *Target version changed from 4.6.3 to 4.6.4*

Resolved with the same fix already merged in #32374.

**#10 - 2012-02-07 08:20 - Xavier Perseguers**

- *Status changed from Resolved to Closed*
