

## TYPO3.Fluid - Bug # 3122

<b>Status:</b>	Resolved	<b>Priority:</b>	Must have
<b>Author:</b>	Bastian Waidelich	<b>Category:</b>	
<b>Created:</b>	2009-04-17	<b>Assigned To:</b>	Sebastian Kurfuerst
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Has patch:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b> ViewHelper arguments are not properly passed to render() method			
<b>Description</b>			
<p>If a ViewHelper registers different arguments than it accepts in the render()-method, arguments are not properly injected:</p> <pre>class MyViewHelper extends \F3\Fluid\Core\TagBasedViewHelper {     @param string \$someArgument     public function render(\$someArgument) {...} }</pre> <p>In this example \$someArgument will have the value of the "additionalAttributes"-argument that was registered in the parent ViewHelper.</p>
