Revision 6ca1f9b2 - 2011-12-20 14:51 - Karsten Dambekalns

[BUGFIX] "Wrong" EOL characters break parsing of doc comments

When $r \in S_{r}$ would retain the r which would cause confusing exceptions in some cases later on.

History

#1 - 2011-10-27 21:47 - Christof Rodejohann

Having trouble with my git environment, so i can't push the patch. The solution is a one-line change in

Packages\Framework\TYPO3.FLOW3\Classes\Reflection\DocCommentParser.php

In Line 50, the \$line has to be stripped of all newline characters. Adding the following line there will fix the bug:

\$line = str_replace(array("\r\n", "\n", "\r"), "", \$line);
