

TYPO3.Neos - Bug # 31369

Status:	Resolved	Priority:	Should have
Author:	Rens Admiraal	Category:	UI
Created:	2011-10-27	Assigned To:	Rens Admiraal
Updated:	2012-01-13	Due date:	
Subject:	Inline javascript is executed a second time by Aloha block implementation		
Description			
<p>Example: the inline javascript on the FLOW3 homepage uses a twitter plugin. The javascript code is added inline. When the aloha blocks are 'blockified' a new parent DOM element is created which is 'wrapped' around the content element. This is probably triggering the browser to execute the inline code again.</p> <p>I already pushed a workaround for the flow3.org website, please check if there's no condition around the code before you try to reproduce this.</p> <p>We need some brainstormers how to fix this.</p>
