TYPO3.Fluid - Bug # 31380

Status:	Resolved	Priority:	Should have
Author:	Adrian Föder	Category:	ViewHelpers
Created:	2011-10-28	Assigned To:	Karsten Dambekalns
Updated:	2012-05-30	Due date:	

Has patch:	No
Affected Flow version:	Git 1.0

Subject:	DocComment of Form.ValidationResultsViewHelper is incorrect

Description

The current DocBlock says:

```
 * <f:form.validationResults>
 *   <f:if condition="{validationResults.flattenedErrors}">
 *     <ul class="errors">
 *       <f:for each="{errors}" as="error">
 *         <li>{error.code}: {error}</li>
 *       </f:for>
 *     </ul>
 *   </f:if>
 * </f:form.validationResults>
```

(see the comment at the getFlattenedErrors() function:
 Get a list of all Error objects recursively. The result is an array,
    where the key is the property path where the error occured, and the
    value is a list of all errors (stored as array))

so due to that error result nesting, it should read:

```
 <f:form.validationResults>
   <f:if condition="{validationResults.flattenedErrors}">
     <dl class="errors">
       <f:for each="{validationResults.flattenedErrors}" as="errors" key="propertyPath">
         <dt>{propertyPath}</dt>
         <dd><dl>
           <f:for each="{errors}" as="error">
             <dt>{error.code}</dt>
             <dd>{error}</dd>
           </f:for>
         </dl></dd>
       </f:for>
     </dl>
   </f:if>
 </f:form.validationResults>
```

(disregard the fact that I use dl's here, although I like them more when it comes to nestings)
