Sprint Focus:	

Subject:	Admin user creation function uses hardcoded md5() for password

Description

The Install Tool function for creating an admin user uses hardcoded md5() for the associated password.
This does not work together with rsaauth/saltedpasswords.

typo3/sysext/install/mod/tx_install.php, line 6082:

```
$insertFields = array(
    'username' => $username,
    'password' => md5($pass),
    'admin' => 1,
    'uc' => '',
    'fileoper_perms' => 0,
    'tstamp' => $GLOBALS['EXEC_TIME'],
    'crdate' => $GLOBALS['EXEC_TIME']
);
```

[FEATURE] Create BE-user in Install Tool with a salted password

Introduce the possibility to salt the password when creating
a new Backend User in the Install Tool. When Saltedpasswords
is installed and backend usage is enabled the password will
be salted with saltedpasswords. Otherwise the md5 hashing method
is still used.
