

TYPO3.Flow - Bug # 31502

Status:	Resolved	Priority:	Must have
Author:	Karsten Dambekalns	Category:	Validation
Created:	2011-11-02	Assigned To:	Karsten Dambekalns
Updated:	2011-12-19	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: FLOW3 1.0.0			
Subject:	Validation during persistence got lost in Doctrine addition		
Description			
When Doctrine 2 was introduced our own persistence backend was removed - but it was the place where validation upon persistence was invoked. This was not discovered as there was no test covering this and argument validation is still working.

Revision c87cc007 - 2011-11-29 21:56 - Karsten Dambekalns

[TASK] Move ObjectValidationFailedException out of Generic

The exception is not specific to generic persistence, thus it should not be inside the Generic namespace.

Revision b809a395 - 2011-11-29 21:56 - Karsten Dambekalns

[BUGFIX] Make validation upon persistence work again

The validation upon persistence was dropped (more or less by accident) when we switched to Doctrine. This change brings it back.

In addition it fixes the exception message produced in the generic AbstractBackend when validation fails.
