<b>Has patch:</b>	Yes		
<b>Complexity:</b>			
<b>Affected Flow version:</b> FLOW3 1.0.0			
<b>Subject:</b>	ReflectionService prevents model from extending abstract base model without repository		
<b>Description</b>			
Hey!			
i ran into some difficulties with using a base class for my models. The "ensureAggregateRootInheritanceChainConsistency" function of the ReflectionService prevents me from extending my Models from another class.			
I attached a diff to allow the extending from abstract classes.			
Greetings Marc

[BUGFIX] Skip abstract classes in ensureAggregateRootInheritanceChainConsistency

When using an abstract base class for domain models, the checks done in ensureAggregateRootInheritanceChainConsistency() would fail, even though it is fine to have an abstract base class not being aggregate root.

As jwa pointed out in irc i could try it with "@ORM\InheritanceType("JOINED")" but i don't want a table for my abstract class.

i tried to use "@ORM\InheritanceType("SINGLE\_TABLE")" but it throws me the error "Base table or view not found: 1146 Table 'flow3.admin\_core\_model' doesn't exist"

Greetings Marc
