I would love to reinvoke that tool and add database setup to it, so you can install phoenix CLI less if needed.

Hey Christian,

please first remove it and let's integrate it as soon as we prioritize it. I think right now we have some more important tasks to do; and I'd rather focus on a few "Baustellen" then having 100s of them open :-)

Is that OK for you?

Greets,  
Sebastian
